DETAILED ACTION

Claims 28 and 35-57 are pending in the present application.

Claims 1-27 and 29-34 have been canceled by Applicant.

In response to communications filed on January 12, 2007, Claims 20-36 are pending in the application, Applicant's arguments have been reconsidered but are not deemed persuasive for the reasons set forth below.

Response to Applicant's Remarks

Examiner has completed a through review and study of Applicant's amendment of January 12, 2007; especially, Applicant's claims 28 and 35-57 and remarks at pages 7-12.

Submitted claims 28 and 35-57 are directed to an invention that is independent or distinct from the invention originally claimed for the following reasons:

- I. Claims 28 —45 (as currently amended) are drawn content decoding captioned data class 709, subclass 206.
- II. Claims 46-49, (as currently amended) are drawn to graphical user interface window displays classified in class 715, subclass 8.
- III. Claims 50-57, (as currently amended) are drawn to obtaining information such as searching, class 707, subclass 3.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single

Art Unit: 2165

combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as content decoding captioned data without requiring the graphical user interface window displays of invention II.

Inventions I and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as content decoding captioned data without requiring the obtaining information such as searching of invention III.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 28 and 35-57 are withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

Because claims 28 and 35-57 are withdrawn, this office action is final.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period

Art Unit: 2165

will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
